## Algerian gas field Alrar sees output boost

Jul 05, 2018 ⌚ 1 min read

Algeria's Alrar gas field output rose by 8.4 million cubic metres per day after the completion of a Petrofac-led EPC contract to extend the life of the field.

Algerian state firm Sonatrach in 2013 awarded Petrofac an engineering, procurement and construction contract to extend the life of the field close to the Libyan border.

Output at the field, which has been in operation since 1987, has risen from 16 to 24.7 million cubic metres per day, Petrofac said in a statement.

The scope of work with joint venture partner Bonatti included the engineering, procurement, construction and commissioning services for the development of new separation and booster compression facilities.

Graham Mac Millan, senior vice president for North Africa said: "I am delighted that the project has successfully moved into the start-up phase and that Sonatrach are now able to boost their production from this enormous field."

Manish Bhojwani, project manager said: "A project such as this involves a number of logistical challenges, particularly as situated in a remote desert region."

## PRODUCTION STARTS FROM ALRAR GAS FIELD IN SOUTHERN ALGERIA

📅 July 06, 2018

📧 🖨️ (<http://www.energyglobalnews.com/production-starts-from-alrar-gas-field-in-southern-algeria/?print=print>)

Monday 2 July 2018 marked a major milestone for Sonatrach, the Petrofac team, and joint venture partner Bonatti, as the Alrar gas field project in Algeria celebrated the start of production.

Officials, including Minister of Interior, Local Authorities and National Planning, Nouredine Bedoui, and Minister of Energy, Mustapha Guitouni, along with senior executives including Sonatrach's Chief Executive, Abdelmoumen Ould Kaddour and Petrofac's Group Chief Executive, Ayman Asfari came together for a symbolic inauguration ceremony at this important gas field.

Petrofac leads the joint venture with Bonatti awarded in 2013 to execute an engineering, procurement and construction contract for Sonatrach to extend the life of the field, which is close to Algeria's border with Libya. Output at the field, which has been in operation since 1987, has risen from 16 to 24.7 million cubic metres per day.

The scope of work included the engineering, procurement, construction and commissioning services for the development of new separation and booster compression facilities.

Commenting on the milestone Graham Mac Millan, Senior Vice President – North Africa, said: *“I am delighted that the project has successfully moved into the start-up phase and that Sonatrach are now able to boost their production from this enormous field.”*

Manish Bhojwani, Project Manager said: *“A project such as this involves a number of logistical challenges, particularly as situated in a remote desert region. I’d like to thank our joint venture partner Bonatti, my project team and the various other parties involved who have worked collaboratively to reach this milestone.”*

The Alrar gas field is a natural gas field located in the Ouargla Province. It was discovered in 1980 and developed by Sonatrach. The total proven reserves of the Alrar gas field are around 4.62 trillion cubic feet, and production is slated to be around 648 million cubic feet/day. # PRODUCTION STARTS FROM ALRAR GAS FIELD IN SOUTHERN ALGERIA

By **OGP Network** - July 6, 2018

Monday 2 July 2018 marked a significant milestone for Sonatrach, the Petrofac staff, and three way partnership associate Bonatti, because the Alrar gasoline subject mission in Algeria celebrated the beginning of manufacturing.

Officials, together with Minister of Interior, Local Authorities and National Planning, Nouredine Bedoui, and Minister of Energy, Mustapha Guitouni, together with senior executives together with Sonatrach's Chief Executive, Abdelmoumen Ould Kaddour and Petrofac's Group Chief Executive, Ayman Asfari got here collectively for a symbolic inauguration ceremony at this necessary gasoline subject.

Petrofac leads the three way partnership with Bonatti awarded in 2013 to execute an engineering, procurement and development contract for Sonatrach to increase the lifetime of the sector, which is near Algeria's border with Libya. Output on the subject, which has been in operation since 1987, has risen from 16 to 24.7 million cubic metres per day. The scope of labor included the engineering, procurement, development and commissioning companies for the event of recent separation and booster compression amenities. Commenting on the milestone Graham Mac Millan, Senior Vice President – North Africa, mentioned: *"I'm delighted that the mission has efficiently moved into the start-up part and that Sonatrach are actually in a position to enhance their manufacturing from this monumental subject."*

Manish Bhojwani, Project Manager mentioned: *"A mission corresponding to this entails plenty of logistical challenges, significantly as located in a distant desert area. I'd wish to*

*thank our three way partnership associate Bonatti, my mission staff and the varied different events concerned who've labored collaboratively to succeed in this milestone."*

The Alrar gasoline subject is a pure gasoline subject positioned within the Ouargla Province. It was found in 1980 and developed by Sonatrach. The whole confirmed reserves of the Alrar gasoline subject are round four.62 trillion cubic ft, and manufacturing is slated to be round 648 million cubic ft/day.
